### **DETAILED ACTION**

This office action is in response to the application filed October 15, 2003. Claims 1-19 are pending.

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, and 19, drawn to a polyimide optical material (capable of use in an optical waveguide) represented by the general formula (1), (2), and (3), classified in class 385, subclass 143.
  - II. Claim 18, drawn to a polyimide precursor solution comprising polyamic acid and represented by the general formula (4), (5), and (6), classified in class 532, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are different organic compounds being comprised of different general formulas, with regards to different formulas (1)–(3) and (4)–(6).

Art Unit: 2874

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
